

3-10

1、注册小程序，获取appid

<http://www.wxapp-union.com/forum.php?mod=viewthread&tid=495>

2、引入hotapp

<https://weixin.hotapp.cn/api/searchkey>

(1)、APP key : hotapp33481812

引入hotapp插件并在小程序的 app.js 的 **onLaunch** 方法里输入 hotApp.init('hotapp33481812')

(2)、设置appid和appsecret :

微信 APP ID : wxccaf75f2a474c729

微信APP secret : 0df62115d0660565afb85aa64c1880ce

3、调用hotapp获取数据 :

(1)、调用hotapp :

var app = getApp(),

hotapp = app.globalData.hotapp

;

(2)、判断是否登录 : wx.login

(3)、获取数据 : searchkey =》 wx.request

4、onReachBottom 页面上拉触底事件的处理函数

```
wx.request({
  url: 'https://wxapi.hotapp.cn/api/searchkey',
  data: {
    prefix: 'image',
    pageIndex: 1,
    pageSize: 3,
    appkey: 'hotapp33481812'
  },
  method: "post",
  header: { "content-type": "application/json" },
  success: function(res) {
    var res = res.data;
    // console.log(res)
    if (res.ret == 0) {
      console.log(res)
      if(res.data.items.length>0){
        that.setData({
          images:res.data.items
        });
      }
    }
  }
})
```

<view class="search" style="position:relative">

<image src="../../images/search.png" style="width:30rpx;height:30rpx;position:absolute;left:7px;top:6px;"></image>

<input placeholder="新闻搜索" style="font-size:28rpx;" placeholder-style="color:#c8c8c8"></input>

</view>

hotapp.js
